

Verification burden and external scrutiny

Decision map is conceptual and evidence-limited: only A2 was executed locally.

Stronger evidence replication only when governance/dispute conditions justify it

A3 transparency / ledger-like
adapter-level only
high cross-organisational scrutiny;
external witness needed
Claim boundary: no executed
transparency/ledger result

external witness desired

A2 Merkle log
executed locally
moderate dispute; portable verification
needed
Claim boundary: local reference result only

portable verification

A1 central audit
specified, not executed
low external dispute; ordinary
organisational audit
Claim boundary: no measured PostgreSQL
result

internal audit suffices

Governance and dispute intensity
